Vita Energy Complex® for men

Energy metabolism • hormone activity
testosterone levels

immune system • muscle function • reduction of fatigue • oxidative stress • nervous system
homocysteine metabolism

Description: Vitamin B₆ contributes to the regulation of **hormonal activity**. Zinc contributes to the maintenance of a normal **testosterone level**. Manganese, vitamin B₆ and B₁₂ contribute to a normal **energy metabolism**. Folic acid and B₁₂ contribute to **reduction of fatigue and exhaustion**. Folic acid, B₆, B₁₂, D and selenium contribute to a normal function of the **immune system**. B₆ and B₁₂ contribute to normal function of the **nervous system**. Vitamin D contributes to the maintenance of normal **muscle function** and the retention of normal **bones**. B₆, B₁₂ and folic acid contribute to a normal **homocysteine metabolism**.

Constituents

L-arginine hydrochloride, vegetable capsule shell (hydroxypropylmethylcellulose, colouring iron oxide), L-carnitine tartrate, pine bark extract (pinus pinaster) with OPC, selenium yeast, coenzyme Q₁₀ pomegranate extract, maca extract, saffron extract, zinc oxide, ginger extract, lycopene, pepper extract, astaxanthin, vitamin B₆ manganese sulphate, folic acid, vitamin D₃ Vitamin B₁₂.

Gluten-free. Lactose-free.

Suitable for diabetics.

Keep out of the reach of children. The recommended daily intake must not be exceeded. A product with OPC does not replace a diet with fresh fruit and vegetables. Does not replace a balanced and varied diet or a healthy lifestyle.
